

Laminator Chain Drive Upgrade Kit

Upgrading critical parts of an existing line will improve the efficiency levels, reduce hygiene times and increase the life of components.

Replacing the existing chain drive on the Laminator Table with the latest Belt Drive System will give improved hygiene, extended component life and lower noise levels. The existing matched chains and sprockets used to move the laminating table and compensating conveyor are replaced by heavy duty timing belts and pulleys.

FEATURES & BENEFITS

- Pre assembled sub assemblies delivered ready to be installed.
- Minimal installation easily completed by your own staff.
- Quick, Easy & Clean integration.
- User Friendly operator interface.
- Easy Clean: Simply wipe down, no lubrication oil.
- Minimal maintenance: No lubrication required, no wear strips.
- Reduced noise level during operation
- Increased component life
- Lower cost: when it is time for replacement the cost of parts is greatly reduced.
